MEMORANDUM FOR	

STAT

STAT

SUBJECT: Routing and Handling of Correspondence or Papers Bearing on Activities of the United States Intelligence Board

- 1. As you know, the Director regularly receives correspondence or papers from USIB members or agencies dealing with matters which have been or will be considered by the USIB. Some of these papers are addressed to him as "Chairman, United States Intelligence Board" and some as "Director of Central Intelligence." The form of the address appears occasionally to have affected the internal routing of such correspondence. For that reason I believe it desirable that we regularize some procedure for handling these papers within CIA.
- 2. Where prior or potential USIB business is referred to in such correspondence it is important that the Executive Secretary, USIB, be advised immediately. I suggest, therefore, that arrangements be made to route this correspondence to the Secretariat at the same time as it is passed to the Director. Where correspondence arrives in duplicate please route the carbon to the Secretariat; if only an original arrives I suggest that it be handcarried to the Secretariat (Room 122, Administration Building) so that a copy can be made and retained by the Secretariat prior to routing the paper to the Director.

ROBERT AMORY, PR.
Deputy Director (Intelligence)

28 January 1959

MEMORANDUM FOR: Executive Officer, O/DCI

SUBJECT

: Proposed USIB Security Committee

- Attached is the memorandum from General Truscott to the Director, dated 21 January, and the memorandum to the Director from the Director of Security, dated 5 November 1958, attaching the proposed DCID on a security committee. I take an exceedingly dim view of the fact that this memorandum and the proposed directive have been circulating approximately three months and were never called to the attention of this office. Not only is the subject a matter of interest to this office, but it directly relates to our work. I recognize of course that the original fault is with the Office of Security for having prepared a concurrence sheet which called for the signatures. of the four deputies but not the Inspector General. It is my opinion, based upon what the Director has said both internally and externally, that matters of a general nature such as this affecting the over-all work of the agency are properly within the purview of this diffice. Consequently I think the Inspector General's name should be included for concurrence. Further, I would point out that there have been several instances lately where matters of direct interest to this staff have only inadvertently come to my attention, and I would assume that there are other matters of interest which have failed to come to our attention.
- 2. As far as the substance of the proposal is concerned, I concur in the proposed directive and believe that it will not conflict with other established committees dealing with security matters as long as its charter is specifically restricted to section 5, NSGID-1. I also reiterate my oral suggestion made at the deputies me eting on 27 January that in presenting this to USIB the Director call to the attention of the Board the memorandum from Gordon Gray on the subject, dated 26 September 1958.

De noted and alexand Lyman B. Kirkpatrick Inspector General

: Proposed Will Security Committee

- 1. This memorandum contains a suggested occurs of action with respect to tabling a proposed BCID at a feture Will smoking. This suggestion is contained in paragraph 2.
- 2. A succession of recent disclosures jeeperdising sources and methods clearly indicates a used for a security committee such as Edwards recommends in his namewoodum attached hereto. Since there is no such cosmittee in excistence to progues such Terms of Reference, I suggest that the best procedure would be for you to table the proposed DCID at an early USIS meeting with en oral statement
  - (a) pointing out the lack of such a comittee at the present time and emphasizing the important assistance such a committee might render;
  - (b) suggesting that the Board members and their staffs study the draft proposal;
  - (c) invite engentions and indicate the availability of Short Edwards and his staff and other CIA offices for equalitation; and
  - (4) consideration for approval at a meeting about two weeks hence.

Executive negut

MEMORANDUM FOR: Director of Central Intelligence

SUBJECT

: Preposed DCD to Establish a USIB Security Committee

- 1. This memorandum contains a recommendation submitted for DCI approval. Such recommendation is contained in paragraph (11).
- 2. The publication of the 15 September 1958 revision of NECID No. 1 (New Series) places certain responsibilities in the security field upon the DCI and the USIB. Since there is neither a committee within USIB nor a regularly constituted inter-Agency medium through which actions might be initiated, it appears necessary that a mechanism be established for this purpose.
- 3. In view of the increased emphasis upon the protection of intelligence and intelligence sources and methods from unauthorized disclosure, it must be assumed that both the DCI and the USIB will review present directives and may initiate action for the further development of policies, procedures, and practices to provide the necessary safeguards for the protection of community intelligence.
  - 4. The security responsibilities under NSCID No. 1 are as follows:

## FOR THE USEB

- a. In Section 2 paragraph a (5) the USIB shall "Develop and review security standards and practices as they relate to the protection of intelligence and of intelligence sources and methods from unauthorised disclosure."
- b. FOR THE MEMBER DEPARTMENTS
  AND AGENCIES

In Section (5), 'Each department and agency, however, shall remain responsible for the

protection of intelligence and of intelligence sources and methods within its own organination. Each shall also establish appropriate internal policies and procedures to prevent the unauthorized disclosure from within that agency of intelligence information or activity".

# FOR THE DIRECTOR OF CENTRAL DITELLIGENCE

intelligence, with the assistance and support of the members of the U.S. intelligence Beard, shall ensure the development of policies and procedures for the protection of intelligence and of intelligence sources and methods from unauthorised disclosure".

In addition to the above the Director has been given a special responsibility as follows: "The Director of Control Intelligence shall call upon the departments and agencies, as appropriate, to investigate within their department or agency any unauthorized disclosure of intelligence or of intelligence sources or methods. A report of these investigations, including corrective measures taken or seconomended within the departments and agencies involved, shall be transmitted to the Director of Control Intelligence for review and such further action as may be appropriate, including reports to the National Security Council or the President".

5. These responsibilities will require a continuing review of security practices and precedures by both the USIB and the member departments and agencies. In this regard Executive Order 10501, effective December 1953, sets the minimum standards for the safeguarding of classified defense information and thus provides uniformity in the basic procedures among the departments and agencies of government. Most departments and agencies in the intelligence community have supplemented Executive Order 10501 with additional internal control procedures, particularly

where intelligence and special source material is involved. These supplemental controls have usually been instituted on the basis of security requirements peculiar to the department or agency concerned and not necessarily on the basis of a security problem common to the intelligence community.

6. There is no present authorized committee within the intelligence community to deal with security matters relating to the overall protection of intelligence and of intelligence sources and methods from unauthorized disclosure and the development of uniformity where appropriate in security procedures. The IAC did not have a committee for security matters of this nature. The USCIB did have a special committee on Comint Personnel Security Standards but this committee has been insperative for the past two years. There was also an established US.AB Security Committee (USCIB SECCOM) largely concerned with procedura. matters, however, this committee, since the fermation of USIB, have been inoperative and there is no security committee in USIB to which its functions can logically be assigned. NSCID No. 6 provides in confermity with Section (2) NSCID No. 1 that the USIB shall study standards and practices of the departments and agencies in protecting Comint; and determine the degree and type of security pretection to be given ELINT activities.

Security directives carried over from the IAC and the USCIB which are currently in effect are DCID No. 11/1, Centrol of Initial Information Regarding Foreign Nuclear Explosions, DCID No. 11/2 Centrol of Dissemination and Use of Intelligence and Intelligence Information, and USCIB No. 5 Standards and Practices for Clearance of Personnel for Comint.

The continuous review of security directives and concern with overall security matters affecting the intelligence community must necessaried be provided for by the USIB to carry out its responsibilities.

7. In the past several years there have been serious unauthorised disclosures of intelligence and intelligence sources and methods. The investigations of these unauthorised disclosures have been carried our under difficult circumstances by the informal cooperative efforts of the security officers in the affected agencies and departments through their

ľ

normal security channels. The informality of this system has retarded the investigative function in that there was no established central coordinating point to channel the investigative activities and exchange timely investigative leads and information. The results of these investigation: revealed several violations of existing security regulations but more importantly, revealed certain weaknesses in the security systems of the intelligence community in the dissemination and the handling of intelligence information. Certain corrective recommendations resulted from these investigations but there was no single committee or mechanism by which action on these corrective measures could be taken on an overall community basis.

8. It is felt that there are more unauthorised disclosures of information than is apparent to the intelligence community and some of their are accordingly never reported and investigated. The intricacies of the intelligence community structure with its specialized committees and special channels of information have aggravated this problem. The discovery of a possible unauthorized disclosure is frequently discement by those intelligence officers dealing with substantive intelligence information who recognize their information in unauthorized hands. Often these suspicions are not immediately forwarded to the professional security officers who must take investigative action. The wide apread and timely exchange of information in the intelligence community makes it impossible to readily kientify, in situations involving an unauthorized disclosure, these departments and agencies involved, as all have been recipients of the identical piece of intelligence information. In the absence of a system for the reporting of suspected violations on a norm musity basis, much valuable time is lost from the investigative standpoint in determining the principal agencies involved and organising the informal liaison contacts in order to pursue a mutual investigative effort. Lacking a clearly defined procedure on a community level, there is certain resultant confusion and duplication of effort. circumstances where the violation is suspected but not evident and no department appears to have primary responsibility or interact, there is a natural hesitation in the intelligence community to suggest through liaison channels that the violation may have occurred in another department. Accordingly, inaction is likely to be the final result,

- 9. In view of the rapid developments in the intelligence complex and frequent adjustments in the organizational structure to meet these changes, the security practices and precedures to be effective must be kept under constant review. Weaknesses that are permitted to develop in the security system will somer or later lead to unauthorized disclosures and the resultant investigations will generally reveal these weaknesses. Failure to eliminate the weaknesses on a community level will merely compound the security problems involved The individual security officers of the member departments and agencies cannot solve these problems by unilateral action but should have a committee mechanism whereby the security efficers can focalize their mutual problems and more effectively develop and coordinate corrective actions.
- 10. It is, therefore, proposed that a USIB committee composed of the responsible security efficers of the member departments and agencies be established to act upon the security responsibilities established for USIB under NSCID No. 1 and to serve as a support mechanisms when requested, to the Director of Central Intelligence in the exercise of his special responsibilities set forth in Section 5 of NSGID No. 1.
- 11. It is recommended that the attached proposed DCID be submitted to the USIB for approval.

CIGNED

Shoffield Edwards Director of Security

## DIRECTOR OF CENTRAL INTELLIGENCE DIRECTIVE NO.

## Security Committee

Persuant to Section 2, sub-paragraph a (5) and Section 5, MBCD: No. 1 (New Series) revised 15 September 1958 and for the purpose of preventing unauthorized disclosure of intelligence and of intelligence sources and methods, a standing committee of the USIB is herebuestablished.

## 1. Composition and Organization

The committee shall be known as the USIB Security Committee and shall include representatives of the USIB agencies. It is expected that the responsible security officers of the member departments and agencies of USIB will serve as the representatives on the committee. Other agencies of the government may be invited by the committee to participate as appropriate. The CIA member will chair the committee.

## 2. Mission

The mission of the committee shall be to premote means by which the intelligence community may prevent the unauthorized disclosure of intelligence and of intelligence sources and methods.

## 3. Functions

- a) To develop and review security standards, practices and procedures as they relate to the protection of intelligence and of intelligence sources and methods from mantherized disclosure, and to make recommendations thereon to the Board. The Committee shall coordinate closely with other Committees of the Board with related security responsibilities.
- b) To assist, as requested, the Director of Central Intelligence in the exercise of his responsibilities pursuant to Section 5, MSCII. No. 1.
- c) To recommend security policy to the USIB as it pertains to the intelligence community. Such pelicy recommendations shall be consonant, however, with the responsibility of each department and agency for the protection of intelligence and or intelligence sources and methods within its own organization and

the establishment of appropriate internal policies and procedures to prevent the unauthorized disclosure from within that department and agency of intelligence information or activity.

d) The Committee shall make such other reports and recommendations to the Board as may be appropriate or requests...
